RE: Modifications to the Former South Shore Marina Property

The ministry purchased the South Shore Marina property, located beside the Bayfield River Bridge, when it was for sale in 2016. The property and a temporary closure of the marina are necessary for construction of the Highway 21 Bayfield River Bridge. Currently, the boat launch has been blocked off using temporary concrete barriers. During construction, the boat launch will be permanently closed and removed from the property, with no plans to relocate the structure within the property.

The ministry is currently working with relevant stakeholders to determine the future of the marina property after construction.
